

Finally, a Security Answer for Your Jobsites!

Zero Grid Required. Maximum Protection.

Stop worrying about copper theft, vandalized equipment, or framing lumber walking away after hours. Phoenix Systems Site-Security Stations are self-sufficient powerhouses designed to drop straight onto your jobsite's fence line and start protecting your project immediately.

Turnkey, rugged, and always on guard.

Finally, a Security Answer for Your Jobsites!
Zero Grid Required. Maximum Protection.

Feature	What It Delivers for Your Jobsite
Always Ready Power	Built with a 200-Watt Solar System and a 100Ah LiFePO4 Battery that keeps running for 2.5 to 3 days even in heavy rain or deep overcast conditions.
Intelligent Detection	Features vehicle & person detection , backed by a 30-watt horn speaker and automatic voice announcements to deter intruders before damage occurs.
Weatherproof Enclosure	All brains, batteries, and cellular routing gear are safely housed inside an air-tight, heavy-duty industrial enclosure .
Your Jobsite in Your Pocket	Powered by a 5-port industrial Ethernet PoE switch and a high-speed 5G router . Log in from anywhere to check project progress, verify sub-contractor arrivals, or review HD feeds.
30-Day Cloud Storage	Rest easy knowing all critical security footage is automatically backed up and accessible for a full month.
